CABINET UPGRADE CHECKLIST

The upgrades clients thank us for later

Print it or save it to your phone — then bring it to your next design conversation. Check off the upgrades that fit how you live, and we'll help you plan the rest.

- Waste Basket Pull-Out**
Keeps trash and recycling hidden and the kitchen feeling intentional. We always recommend it.
- Servo-Drive on the Waste Pull-Out**
Open it hands-free with a hip or knee — cleaner, more hygienic, and genuinely fun to use.
- Custom Cutlery Insert**
A perfect fit means nothing shifts, rattles, or needs replacing later. Quiet order, every drawer.
- Sink Base Drip Tray**
Protects cabinets from leaks and catches small plumbing issues early. The quiet long-term winner.
- Tray Dividers**
Vertical storage for cutting boards and cookie sheets — no more stacking and shuffling.
- Under-Cabinet + In-Cabinet Lighting**
Better visibility, warmth, and ambiance. Foundational, not optional — and the most-used lighting in the kitchen.

Plan these early. Including these in the original design is cleaner, better coordinated, and better value than adding them later.

READY TO PLAN YOURS?

Let's talk through which of these make sense for your space.
